<sup>2</sup> The returns for periods of more than one year are compound annualized rates while those for less than a year correspond to the change as seen in the stated period. To meet high standards of transparency and provide a better assessment of the gains or losses on investments, the Ministry of Finance discloses the fund's return in different time horizons and currencies. With respect to the time horizon, it is important to note that, in keeping with the medium- and long-term investment policy, the return assessment should focus on that period, disregarding fluctuations that may occur monthly or quarterly. Regarding returns expressed in different currencies, the return in US dollars allows for an assessment which is more in line with the investment policy given that the fund's resources are wholly invested abroad and in foreign currencies. The return in Chilean pesos is also disclosed. This return reflects changes in the peso-dollar exchange rate and, therefore, may experience greater fluctuations. Finally, as with any investment, returns obtained in the past do not guarantee future positive results.

<sup>(a)</sup> Excess returns for periods longer than one year are highly influenced by the withdrawals made to the fund during the pandemic. If excluded the days in which waivers are granted to managers to deviate from the benchmark due to the impact that contributions and withdrawals have on their portfolios, the excess return in the last 3 years and since inception was -20 basis points and -23 basis points, respectively.

<sup>4</sup> Standard deviation of annualized monthly gross returns of the past three years.

<sup>5</sup> Standard deviation of annualized monthly excess gross returns of the portfolio against the benchmark in the past three years.

<sup>6</sup> The Central Bank of Chile is responsible for the investment of the sovereign fixed-income portfolio (42% of the fund) and the US Agency MBS portfolio (6% of the fund). In the case of the last one, the administration is delegated to BNP Paribas and Western Asset Management. The investment of the equities portfolio (31% of the fund) is the responsibility of Mellon Capital Management Corporation and UBS Asset Management (UBS), while the investment of the corporate bonds portfolio (13% of the fund) is the responsibility of UBS and BlackRock Institutional Trust Company, and the investment of the high yield portfolio (8% of the fund) is the responsibility of Nomura Asset Management and BlackRock Institutional Trust Company. The entities responsible for investing the equity portfolios were selected in 2011 (Mellon) and 2020 (UBS), and the corporate bond portfolio manager was selected at the end of 2020, while the entities responsible for investing portfolios of US Agency MBS and high yield bonds were selected at the beginning of 2019.

<sup>7</sup> The Custody bank is JP Morgan.

<sup>8</sup> Corresponds to other expenses, for example, consulting, and overdraft fees, reimbursements, among others.

## VI. APPENDIX

### VI. 1. Benchmarks<sup>9</sup>

A benchmark is defined for each asset class of the strategic asset allocation and corresponds to a representative index of the corresponding market:

**Table 7: Long-Term Portfolio's Benchmarks**

Asset Class	Percent of Total Portfolio	Benchmarks
Sovereign and Government Related Bonds <sup>(a)</sup>	34.0%	Bloomberg Global Aggregate: Treasuries Index (USD unhedged) Bloomberg Global Aggregate: Government-Related Index (USD unhedged)
Inflation-Linked Sovereign Bonds	8.0%	Bloomberg Global Inflation-Linked Index (USD unhedged)
US Agency MBS	6.0%	Bloomberg US Mortgage Backed Securities (MBS) Index (USD unhedged)
Corporate Bonds	13.0%	Bloomberg Global Aggregate: Corporates Index (USD unhedged)
High Yield Bonds	8.0%	Bloomber Global High Yield Index (USD unhedged)
Equities	31.0%	MSCI All Country World Index <sup>(b)</sup> (USD unhedged with reinvested dividends)
<b>Total</b>	<b>100.0%</b>	

<sup>(a)</sup> For this asset class, the subindexes are weighted by relative capitalization.

<sup>(b)</sup> Exclude Chile.

<sup>9</sup> This benchmark is used since January 17th, 2020 for the long-term portfolio. The short-term portfolio was terminated on June 8th, 2021.
