## II. Return as of March, 2017

The monthly return in US dollars was 0.32%. This is disaggregated in the performance of Sovereign and Government Related Bonds, 0.21%, Inflation Indexed Sovereign Bonds, 0.15%, Corporate Bonds, -0.07%, and Equities, 1.27%. The return of the Sovereign Fixed Income portfolio was mostly due to the appreciation against the US dollar of the currencies in which the portfolio is invested, and it was compensated by the negative return it had in local currency. The Corporate Fixed Income portfolio also had a negative return in local currency, but it was not fully compensated by the positive effect of the exchange rates movements. On the other hand, the Equities portfolio had positive returns both in local currencies and in dollars. In pesos, the monthly return of the fund was 3.03%. Finally, the fund accumulates during the year a return of 2.65% in dollars and 1.96% in pesos, while the annualized return since inception was 3.39% and 5.47% respectively.

Returns <sup>(a)</sup>	Month	Last 3 Months	YTD	Last 12 months	Last 3 years (annualized)	Since Inception <sup>(b)</sup>

Return in CLP <sup>(c)</sup>	3.03%	1.96%	1.96%	-0.54%	7.05%	5.47%

(a) Time Weighted Return (it is calculated as the growth rate of the funds that were invested throughout the period).

(b) It is calculated from March 31, 2007, when the performance of Central Bank of Chile started to be measured.

(c) Return in CLP corresponds to the sum of the percentage change of the exchange rate CLP/USD and the return in USD.

Returns for periods of more than one year are compound annualized rates while those for less than a year correspond to the change as seen in the stated period. With a view to meeting high standards of transparency and providing a better assessment of the gains or losses on investments, the Ministry of Finance discloses the fund's return in different time horizons and currencies. With respect to the horizon, it is important to note that, in keeping with the medium- and longterm investment policy, the return assessment should focus on that period, disregarding fluctuations that may occur monthly or quarterly. With regard to returns expressed in different currencies, the return in US dollars allows for an assessment which is more in line with the investment policy given that the fund's resources are wholly invested abroad and in foreign currency. The return in Chilean pesos is also disclosed. This return reflects changes in the peso-dollar exchange rate and, therefore, may experience greater fluctuations. Finally, as with any investment, returns obtained in the past do not guarantee future positive results.
