## An Update on COVID-19 in Chile

More than 54.9 million vaccines have been administered, with 92.2% of the target population completing the process (86.0% in the population under 18 years and 93.8% in the population over 18 years). Chile stands out for being the country with the largest share of population vaccinated with booster doses, reaching 75.5 per 100 inhabitants. In total, 14.3 million booster doses have been administered. Chile has begun the 4<sup>th</sup> dose vaccination process for people over 18 years old.
