## An Update on COVID-19 in Chile

More than 59 million vaccines have been administered, with 92.6% of the target population completing the process (87.2% in the population under 18 years and 93.9% in the population over 18 years). Chile stands out for being among the countries with the largest share of population vaccinated with booster doses, reaching 79.5 per 100 inhabitants. In total, 15.0 million booster doses have been administered. Since the beginning of the 4<sup>th</sup> dose vaccination program in April 2022, 8.9 million doses have been administered.
