II. Return as of August 2016

Return in US dollars was -0.78% in August. This was mainly due to the performance of Money Market and Sovereign Bonds, -0.90%, and Sovereign Inflation Linked Bonds, -0.37%. By month-end these portfolios represented 88.8%, and 3.5% of the fund, respectively. The performance of Equity portfolio in US dollars was 0.34% and represented 7.7% of the fund. Monthly returns in US dollar for both Money Market and Sovereign Bonds portfolio and Sovereign Inflation Linked Bonds portfolio were mainly explained by the depreciation against the US dollar of the main currencies in which the portfolios are invested, and by the performance, in local currency, of the instruments held in both portfolios. The return of the fund in pesos was 0.45% in August mostly explained by a 1.24% appreciation of the US the dollar relative to the peso. Year to date return was 7.71% in US dollars and 2.88% in pesos, while annualized return since inception was 2.94% in US dollars and 5.32% in pesos.

^(a) Time Weighted Return (it's calculated as the growth rate of the funds that were invested throughout the period).

^(b) It's calculated from March 31, 2007, when the performance of Central Bank of Chile started to be measured.

^(c) CLP return corresponds to the sum of the percentage change of the CLP/USD exchange rate and the USD return.

Returns for periods of more than one year are compound annualized rates while those for less than a year correspond to the change as seen in the stated period. With a view to meeting high standards of transparency and providing a better assessment of the gains or losses on investments, the Ministry of Finance discloses the fund's return in different time horizons and currencies. With respect to the horizon, it is important to note that, in keeping with the medium- and long-term investment policy, the return assessment should focus on that period, disregarding fluctuations that may occur monthly or quarterly. With regard to returns expressed in different currencies, the return in US dollars allows for an assessment which is more in line with the investment policy given that the fund's resources are wholly invested abroad and in foreign currency. The return in Chilean pesos is also disclosed. This return reflects changes in the peso-dollar exchange rate and, therefore, may experience greater fluctuations. Finally, as with any investment, returns obtained in the past do not guarantee future positive results.
