II. Return as of July, 2018

The monthly return in US dollars was 0.39%. This is decomposed in the return of the Sovereign and Government Related Bonds, -0.41%, Inflation Indexed Sovereign Bonds, -0.24%, Corporate Bonds, 0.67% and Equities 3.04%. On one hand, the negative returns in US dollars experienced by the sovereign fixed income portfolio were explained by both the negative return on local currency and the negative effect of the depreciation of the currencies in which the instrument are invested, standing out the depreciation of the Japanese yen. On the other hand, the positive return of the corporate bonds portfolio and the equity portfolio, was mainly explained by the positive result in the currency of origin of the instruments. In pesos, the monthly return of the fund was -1.03%. Finally, the fund accumulated during a year a return of -1.01% in dollars and a return of 2.78% in pesos, while the annualized return since inception was 3.58% and 5.13% respectively.

(a) Time Weighted Return (it is calculated as the growth rate of the funds that were invested throughout the period).

(b) It is calculated from March 31, 2007, when the performance of Central Bank of Chile started to be measured.

(c) Return in CLP corresponds to the sum of the percentage change of the exchange rate CLP/USD and the return in USD.

Returns for periods of more than one year are compound annualized rates while those for less than a year correspond to the change as seen in the stated period. With a view to meeting high standards of transparency and providing a better assessment of the gains or losses on investments, the Ministry of Finance discloses the fund's return in different time horizons and currencies. With respect to the horizon, it is important to note that, in keeping with the medium- and longterm investment policy, the return assessment should focus on that period, disregarding fluctuations that may occur monthly or quarterly. With regard to returns expressed in different currencies, the return in US dollars allows for an assessment which is more in line with the investment policy given that the fund's resources are wholly invested abroad and in foreign currency. The return in Chilean pesos is also disclosed. This return reflects changes in the peso-dollar exchange rate and, therefore, may experience greater fluctuations. Finally, as with any investment, returns obtained in the past do not guarantee future positive results.
