II. Return as of August, 2018

The monthly return in US dollars was 0.09%. This is decomposed in the return of the Sovereign and Government Related Bonds, 0.01%, Inflation Indexed Sovereign Bonds, -0.51%, Corporate Bonds, 0.18% and Equities 0.81%. The returns in US dollars experienced by the sovereign and government related bonds were mainly explained by the positive return in the currency of origin. The negative return of the Inflation linked sovereign bonds is mainly explained by the effect of the depreciation of the currencies in which the instruments are invested, highlighting the euro and the pound. The positive return on the corporate bonds portfolio was explained by the positive result in the currency of origin, which was in part negatively affected by the negative effect of the depreciation of the currencies in which the instruments are invested. The positive return on the equity portfolio was explained by the positive result in currency of origin, which was slightly affected by the depreciation of the currencies in which the instruments are invested. Finally, the monthly return of the fund in pesos was 5.82%. The year to date return was -0.92% in dollars and 8.77% in pesos, while the annualized return since inception was 3.56% in USD and 5.62% in pesos.

(a) Time Weighted Return (it is calculated as the growth rate of the funds that were invested throughout the period).

(b) It is calculated from March 31, 2007, when the performance of Central Bank of Chile started to be measured.

(c) Return in CLP corresponds to the sum of the percentage change of the exchange rate CLP/USD and the return in USD.

Returns for periods of more than one year are compound annualized rates while those for less than a year correspond to the change as seen in the stated period. With a view to meeting high standards of transparency and providing a better assessment of the gains or losses on investments, the Ministry of Finance discloses the fund's return in different time horizons and currencies. With respect to the horizon, it is important to note that, in keeping with the medium- and longterm investment policy, the return assessment should focus on that period, disregarding fluctuations that may occur monthly or quarterly. With regard to returns expressed in different currencies, the return in US dollars allows for an assessment which is more in line with the investment policy given that the fund's resources are wholly invested abroad and in foreign currency. The return in Chilean pesos is also disclosed. This return reflects changes in the peso-dollar exchange rate and, therefore, may experience greater fluctuations. Finally, as with any investment, returns obtained in the past do not guarantee future positive results.
